Profile

Analytical and detail-oriented IT professional with over 10 years of experience supporting enterprise infrastructure, analysing operational data, and improving business processes through data-driven decision-making. Holds an MSc in Advanced Computer Science with a focus on Data Science, Machine Learning, Deep Learning, and Information Retrieval. Experienced in Python, SQL, Excel, data analysis, reporting, automation, and technical documentation. Proven ability to analyse complex datasets, identify trends, automate repetitive processes, and communicate actionable insights to technical and non-technical stakeholders. Seeking a Data Analyst role where strong analytical, technical, and problem-solving skills can support business growth and operational excellence.

Work History

Jan 2020 – April 2026, Network Engineer, TXP Technology, UK

- Collected, analysed, and interpreted enterprise network and infrastructure performance data to identify trends and support operational improvements.
- Produced technical reports, implementation documentation, and project summaries for enterprise infrastructure deployments.
- Automated routine operational tasks and reporting using Python and Shell scripting, improving efficiency and reducing manual effort.
- Investigated system and network performance using monitoring data to identify recurring issues, capacity trends, and optimisation opportunities.
- Worked closely with project managers, engineers, and stakeholders to translate business requirements into technical solutions.
- Maintained accurate project documentation, implementation records, and operational reports throughout project lifecycles.

Jan 2013-Dec 2019, IT Service Desk Analyst, IP Global, UK

- Analysed operational data, service desk records, and infrastructure performance metrics to support troubleshooting and improve service delivery.
- Generated technical reports and performance summaries using operational and incident data.
- Supported ServiceNow reporting and analysed SLA trends to assist operational decision-making.
- Automated repetitive administrative processes using Python and PowerShell.
- Collaborated with technical teams to improve operational efficiency through data-driven analysis.
- Produced detailed technical documentation for enterprise infrastructure projects and system changes.

Aug 2008-Feb 2013 Network Administrator, Jimma University, Ethiopia.

- Analysed infrastructure performance metrics to improve network reliability and service availability across campus.
- Produced operational reports and documentation supporting ICT planning and infrastructure expansion projects.

- Managed Linux services and MySQL databases supporting university information systems.
- Used monitoring tools and performance data to investigate recurring issues and recommend improvements.
- Worked with academic and administrative departments to support data-driven ICT planning.

Technical Skills

- Programming: Python, SQL, Bash
- Data Analysis: Data Cleaning, Data Validation, Exploratory Data Analysis (EDA), Statistical Analysis, Data Interpretation, Data Quality
- Data Tools: Pandas, NumPy, Jupyter Notebook
- Reporting & Visualisation: Microsoft Excel (Advanced), Power BI (Working Knowledge), Charts, Dashboards, KPI Reporting
- Databases: SQL, MySQL
- Machine Learning: TensorFlow, Keras, Scikit-learn, Neural Networks
- Business Analysis: Requirements Gathering, Process Improvement, Documentation, Stakeholder Communication
- Cloud & Platforms: AWS, Microsoft 365
- Tools: Git, ServiceNow, Jira
- Operating Systems: Windows, Linux, macOS

MSc Advanced Computer Science (Merit)

University of Strathclyde, Glasgow, UK | 2024 – 2025

Enterprise and distributed systems, networked computing environments, service monitoring and optimization, automation techniques, information management, technical research, and project management, strengthening capabilities in network design, operations, troubleshooting, and infrastructure delivery.

BEng Networked Systems Engineering (Merit)

Glasgow, UK | 2014 – 2017

BSc Computer Engineering (Distinction)

MITC, Ethiopia | 2004 – 2007

Academic Data Analysis Projects

- Performed exploratory data analysis using Python, Pandas, and NumPy.
- Cleaned and transformed structured datasets for analysis and predictive modelling.
- Built machine learning models using TensorFlow and Scikit-learn.
- Created charts, graphs, and visualisations to communicate analytical findings.
- Applied SQL queries to retrieve, filter, aggregate, and analyse structured data.
